

Already 2 years ...

Already two years since EONA started and the results are significant:

- Lots of successful installed software around the world including more than 5000 TV end points equipped with Digital Entertainment Solution (D.E.S)
- Prestigious references acquired on numerous markets such as hospitality, healthcare and education.
- A digital know-how awarded through R&D projects on a national and European level, in particular with MPEG4 H264-AVC standard and WIFI.

A positive balance thanks to EONA's staff and to our distributor network without which we would not exist today. Thanks to our team and especially thanks to all of you for your confidence.

Beyond the past, the future will be promising as EONA will reveal its new product range in the early beginning of 2006.

This strategy to be developed in our next publication will show our dedication to distributors, partners and users with a single slogan: "BE INTERACTIVE".

Be interactive

Interactivity premiere for hospital TV in France

Multimedia furniture

Adapted to the hospital management needs (personal access code, pre-payment...) this accomplishment announces the **new EONA software generation**. It had been carried out with **DSL technology** to avoid new wiring by using the existing installed network.

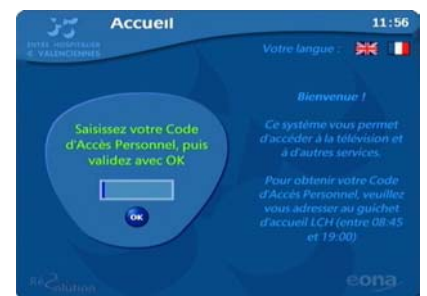

LA COMMUNICATION HOSPITALIERE has demonstrated its understanding of the health care world with "Resolution", a perfectly adapted solution in terms of room equipment integration, in particular with ergonomic and multi functional **multimedia furniture**.

With a first section of **1000 beds in 2005 and 1700 extra beds on the horizon of 2007**, this accomplishment completes a new stage in EONA development and the company banks on other similar projects in France and elsewhere.

Thanks to **LA COMMUNICATION HOSPITALIERE**, our French healthcare operator, EONA unveils the first 100% digital interactive solution for the **Centre Hospitalier of Valenciennes**.

"Resolution" (name of the multimedia offer by our operator) is the appropriate solution to meet the patients' expected services:

- Digital TV bouquet
- Pay TV
- Video on Demand
- Internet
- Email...

D.E.S : a new Audio service that's in tune !

D.E.S includes a new audio service: a digital juke box, organized per category (classical, pop, rock, jazz, electro...).

EONA can offer a **music catalogue of 500 or 1000 tracks** with a quarterly renewal of 30%.

Linked to the EONA negotiated catalogue, this new service will allow the hotel:

- to set up **Audio on Demand in-rooms**
- to dispose of an audio asset to manage **background music** in the main hotel areas.

EONA on stage with Media Retrieval Solution

EONA has shown its connection with the world of cinema and video in two exhibitions where the **Media Retrieval Solution** product (M.R.S) held a place of honour:

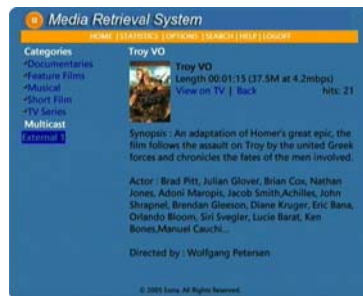

- During the last **MIPCOM**, the international audiovisual content market, (17th-21st October 2005) in Cannes (France), EONA presented M.R.S through its partner **BUTTON DESIGN**. M.R.S has demonstrated that it is the ideal tool to allow digital access to video contents and thus to facilitate exchanges between buyers, producers and program distributors.
- During the **International Animated Film Market (MIFA)** which took place in Anney (France) in June 2005, EONA installed 25 viewing points (set-top boxes + TV) with a **digital video library** for professionals to view the films in official competition or available on the film market.

Through these prestigious events and beyond the interest towards M.R.S product regarding digital video contents, EONA reinforces its **content aggregator** activity.

Simultaneously to its software activity, EONA has secured **agreements with Majors** (Universal, Paramount and DreamWorks) **to distribute digital films** providing an attractive offer of video contents in the hospitality market.

Rewind & Forward...

◀ September 2005 - GITEX (Dubai)

EONA participated to the last GITEX in Dubai in its Middle East integrator booth, the **US TELE-COMMUNICATION** group.

◀ September 2005 - Bernardin Hotel (Slovenia)

EONA achieves with **ISKRATEL**, its Eastern Europe integrator, their third hotel equipped with D.E.S product: the Four Star Bernardin Hotel (250 rooms) located on the Adriatic Sea.

▶▶ Nov. 2005 - Eden Rock Hotel (St Bartholomew)

LST is installing D.E.S in the Eden Rock rooms and suites, a Five Star hotel of the G.L.A Hotels group located in the French Caribbean Islands.

▶▶ December 2005 - Holiday Inn (France)

After Bordeaux Pessac, **VISACOM** is carrying out the installation of D.E.S in a second Holiday Inn hotel of 120 rooms in Toulouse Blagnac.
